

**Year Group: 2**  
Summer

**Knowledge Organiser:** Science - Plants  
**Theme:** Globetrotters

### Key information:

You will investigate and learn about what plants need to grow and stay healthy

You will plant bulbs and seeds and observe how they grow into mature plants

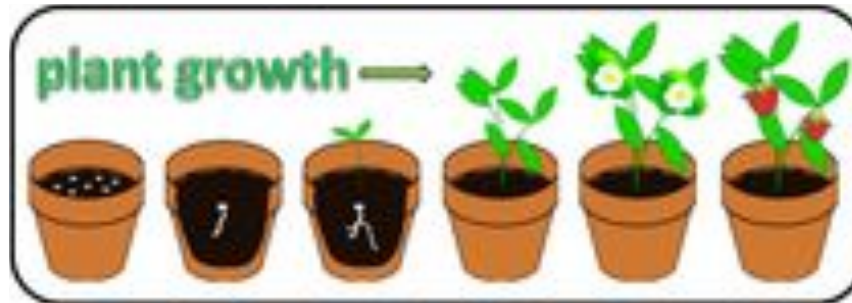

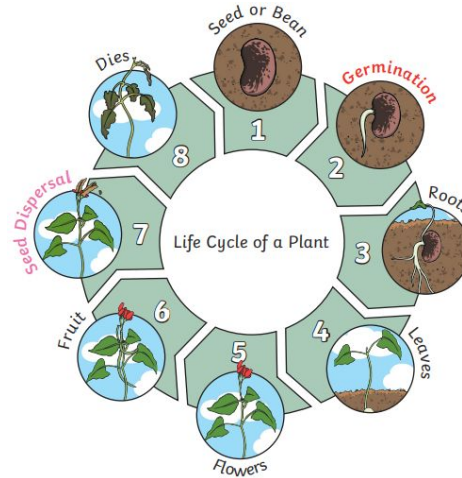

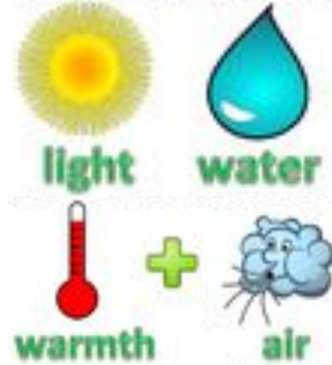

### What have I learnt already?

I can identify and name a variety of different plants, including some wild plants, garden plants and trees.

I can describe and name the basic parts of a plant, including flowering plants and trees.

### Key knowledge that will be learnt

To grow and stay healthy, a plant needs:

### Key Vocabulary

sunlight	Light produced by the sun that helps plants to grow.
temperature	How warm or cold something is.
nutrition	All about diet. Eg. Food. Plants make their own food.
germination	When a seed starts to grow.
shoot	Grows upwards from a seed to find sunlight.
