

**Year Group 2**  
Summer

**Knowledge Organiser:** Science - Living things and their habitats  
**Theme:** Globetrotters

### Key information:

You will explore and compare things that are living, dead and things that have never been alive

You will find out about how different living things give birth to their offspring

### What have I learnt already:

I can identify and name a variety of different plants and animals including fish, reptiles, birds and mammals

I know about the four seasons

### Key knowledge that will be learnt

Examples of things that are alive, dead and never living:

Some animals give birth to live young.

Some animals lay eggs which the young hatch from.

Both of these types of young then develop into adults.

Some offspring look like their adult when they are born.

Some offspring do not look like their adult when they are born.

### Key Vocabulary

Life process	Things all living things do for example grow, breathe, eat or move.
Living	Something that has all the life processes.
Dead	Something that had all the life processes, but doesn't anymore.
Never living	Something that never had the life processes.
Habitat	The natural place where something lives.
Survive	To stay alive.
Live young	Offspring that has not hatched from an egg.
