

Year Group 1
Spring

Knowledge Organiser: History

Theme: Animal Kingdom

By the end of this unit:

You will know why George Washington Carver is a significant person. You will be using the historical strand of enquiry to find out about George Washington Carver

Key knowledge that will be learnt:

George Washington Carver was a botanist and agricultural scientist.

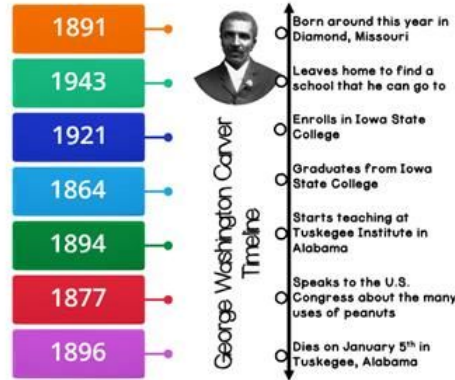

How will you be using your enquiry skills?

You will look at photos, videos and artefacts to find out about George Washington Carver. You will use the information you find to talk about his legacy.

What have I learnt already:

In the autumn term you looked at the legacy of Mansa Musa, Guy Fawkes & Mary Seacole

George Washington Carver is a key figure in black history as he was the first African American to earn a Bachelor of Science degree.

We study George Washington Carver to understand how he helped poor black farmers to learn how to successfully grow things without relying on others.

Key Vocabulary:

agriculture	When farmers learn to look after the soil to grow healthy crops and raise animals
botanist	The study of plants
inventor	People who think of new machines or find a new way of doing things
scientist	Someone who learns about the natural world through research, evidence and testing and then shares the knowledge
