

Design and Engineering Challenge

Most of the useful objects around your home have been designed and engineered by someone.

Go on an object hunt. Find a different object for each challenge.
Draw or photograph the things that you find.

Find something

that was designed
to solve a problem

that could **not** be
made from glass

that you think is both
beautiful and useful

designed to be
thrown away

designed to be
comfortable

that you wish you
had invented

that is made from
lots of parts

that makes your
life easier

that you think was
expensive to make

with an interesting
pattern
