Knowledge Organiser: Real word tech

What have I learnt already

I know how basic technology works This includes using a:

- Chromebook
- Tablet
- Camera

I can explain how to use different pieces of technology
I am familiar with

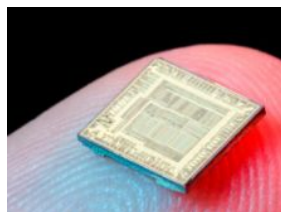

Key learning

I will share what I like and dislike about technology that I use

I will be able to locate switches and buttons on a device and explain how they work

A microchip is a tiny piece of material that holds a lot of information on it. Microchips can be found in devices to make them work

Key Vocabulary:

Technology	Is the use of knowledge to invent new devices and tools
Device	An invention or machine used to do a specific task
Connect	To join or link together
Microchip	A tiny piece of material that can store lots of information
Automatic	Something that works by itself
Sensor	An object that detects changes in the environment around it
