

Key information:

I will learn that living things can be grouped in different ways

I will be able to identify and name a variety of living things using classification keys

I will understand that environments can change and this can sometimes be dangerous to living things

What have I learnt already:

To name a variety of different animals and plants

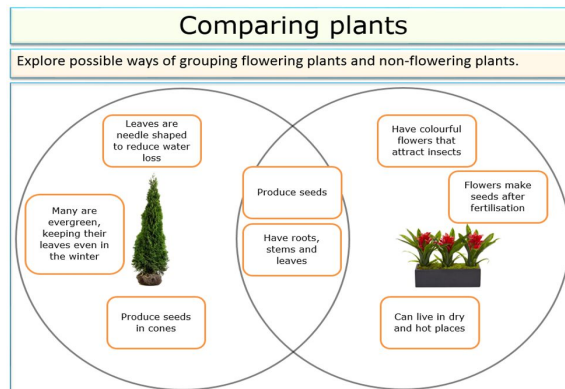

To name and describe a number of different habitats

To name the survival conditions of certain animals

Key knowledge that will be learnt

Living things can be sorted and classified using a **Venn diagram** or a **Carroll diagram**.

Example of sorting with a Venn diagram.

Example of sorting with a Carroll diagram

	Has legs/arms	Does not have legs/arms
Can swim		
Cannot swim		

Key Vocabulary

Habitat	The environment where plants and animals live
Classify	To sort things into groups based on their characteristics
Classification key	A diagram showing how you have separated things based on their characteristics
Environment	All our surroundings including the air, soil, water, plants, and animals make up the environment
Human impact	How humans affect the environment
