

# Year 5

Summer

## Knowledge Organiser: Computing

Real word tech

What have I learnt already:

Explain how computers are **connected** in the school network

Explain how sensors are used in technology to **trigger events automatically**

Use a data logger independently to **measure and log** external conditions

Key learning:

Explain the **difference between the internet and the WWW (World Wide Web)**

Explain some **ways** that it might be **dangerous to interact with technology**

Key Vocabulary:

Client

A client is **any computer** hardware or software **device that requests access to a service** provided by a server.

Hub

A device that joins **a group of computers together**.

Global

Relating to **the whole world**; worldwide.

React

To **act in response** to something.

Implication

An implication is **based on the "if this, then that" model**.

Trigger

A device that **initiates an action when an event occurs**.
